

Getting Started with Jira

A Hands-On Assignment

Course / Subject:	Project Management / Agile Tools	
Student Name:	PATEL DEVAN S.	Roll No: 23SS02IT187
Submission Date:	03/07/2026	Total Marks: 50

Assignment Objective

Jira is one of the most widely used project management and issue-tracking tools in the software industry, built by Atlassian. By the end of this assignment, you will know how to create a Jira account, set up a project, create and manage issues, use a Scrum/Kanban board, and track progress the same core skills used by real software teams.

Each task below has clear steps. If you get stuck at any point, every task includes a short YouTube tutorial link you can watch to see the exact steps performed on screen.

Learning Outcomes

- Create a free Jira Cloud account and understand its interface.
- Create a project and configure a Scrum or Kanban board.
- Create, assign, and prioritize issues (Epics, Stories, Tasks, Bugs).
- Move issues through a workflow (To Do → In Progress → Done).
- Use sprints, backlogs, and basic reporting features.

General Reference Playlist

Keep this playlist open in another tab while working through the assignment it covers everything from account setup to creating a Scrum board, in order:

Stuck? Watch this: Jira Tutorial for Beginners (Full Course)

<https://www.youtube.com/watch?v=8jWKwiIcWPI>

Covers account creation, project setup, issue creation, and board basics end-to-end.

Task 1: Create Your Jira Account and Log In

Jira requires an Atlassian account. Follow these steps carefully:

1. Open your browser and go to
2. Open your browser and go to atlassian.com/software/jira and click “Get it free”.
3. Sign up using your email address (college email is fine), or continue with Google/Microsoft.
4. Verify your email address by clicking the verification link Atlassian sends you.

5. Choose a site name (this becomes your-sitename.atlassian.net this is your Jira URL).
6. When asked “What will you be using Jira for?” select Software development.
7. Once your account is created, you will land on the Jira dashboard this confirms you are successfully logged in.
8. For future logins, simply go to your-sitename.atlassian.net and sign in with the same email/password.

Deliverable: Take a screenshot of your Jira dashboard after logging in and paste it below.

Stuck? Watch this: How to Sign Up & Log In to Jira (Beginners)

<https://www.youtube.com/watch?v=NDVSMIVYxm8>

Shows the full sign-up flow from scratch, including choosing your site name.

Task 2: Create Your First Project

Once logged in, you'll create a project to work in for the rest of this assignment.

1. From the dashboard, click “Create project” (or the “+” icon in the left sidebar).
2. Select a template choose “Scrum” for sprint-based work or “Kanban” for continuous flow. For this assignment, choose Scrum.
3. Give your project a name (e.g., “Campus Event App”) Jira auto-generates a project key (e.g., CEA).
4. Choose “Team-managed” project type if prompted (simpler, ideal for students).
5. Click “Create project”. You will be taken to your new project's board.

Deliverable: Note your Project Name and Project Key here:

Project Name: My Software Team

Project Key: MST

Stuck? Watch this: Creating a Project in Jira (Scrum vs Kanban)

<https://www.youtube.com/watch?v=GPOWZSxEsIU>

Explains the difference between Scrum and Kanban templates before you create your project.

Task 3: Understand Jira Terminology

Before creating issues, learn these key terms. Fill in the right-hand column in your own words:

Term	Your Definition (fill in)
Epic	A large feature or project that is divided into multiple stories and tasks.
Story	A requirement or feature written from the user's point of view.
Task	A specific piece of work that needs to be completed.
Bug	A defect or error in the software that needs to be fixed.
Sprint	A fixed period of time during which a team completes selected work.
Backlog	A list of all pending issues, tasks, and requirements in a project.
Board	A visual tool used to track the progress of issues through different workflow stages such as To Do, In Progress, and Done.

 **Stuck? Watch this: Agile & Jira Terms Explained**

https://www.youtube.com/watch?v=uM_m6EzMg3k

Good for understanding Epics, Stories, Sprints, and other Agile terms used inside Jira.

Task 4: Create Issues (Epic, Stories, Tasks, Bug)

Now populate your project's backlog with real issues.

9. Go to the Backlog view from the left sidebar.
10. Click “Create” (top bar) or “+ Create issue” inside the backlog.
11. Create 1 Epic e.g., “User Authentication Module”.
12. Create 3 Stories under that Epic e.g., “As a user, I want to sign up with email”.
13. Create 2 Tasks smaller technical to-dos (e.g., “Set up database schema”).
14. Create 1 Bug describe a fictional bug (e.g., “Login button unresponsive on mobile”).
15. For each issue, set a Priority (Low/Medium/High) and assign it to yourself.

Deliverable: List the issues you created with their type and priority:

Issue Summary	Type	Priority	Assignee
User Authentication Module	Epic	High	Rishabh
As a user, I want to sign up with email	Story	High	Rishabh
As a user, I want to log in using email and password	Story	High	Rishabh
As a user, I want to reset my forgotten password	Story	Medium	Rishabh
Set up database schema	Task	Medium	Rishabh
Design login page UI	Task	Medium	Rishabh
Login button unresponsive on mobile devices	Bug	High	Rishabh

 **Stuck? Watch this: How to Create Epics, Stories, Tasks & Bugs in Jira**

https://www.youtube.com/watch?v=-6yl54_3rKk

Walks through creating every issue type step by step inside a real project.

Task 5: Start a Sprint and Use the Board

Sprints let your team work on a focused set of issues for a fixed time period.

6. In the Backlog view, select the issues you created and drag them into the Sprint section (or click “Create sprint” first if none exists).
7. Click “Start sprint”, set a sprint duration (e.g., 1 week) and a sprint goal.
8. Go to the Board view you'll now see columns: To Do, In Progress, Done.
9. Drag at least 2 issues from “To Do” to “In Progress”, and 1 issue to “Done”.

10. Click on an issue card and add a comment describing what you “did” to complete it.

Deliverable: Screenshot your board showing issues in different columns.

Stuck? Watch this: Starting Sprints and Using the Jira Board

<https://www.youtube.com/watch?v=Wm8SUu48zg4>

Shows the full new Jira UI starting a sprint, moving cards, and tracking progress.

Task 6: Explore Reports (Optional but Recommended)

Jira automatically generates reports from your sprint activity.

16. Open the left sidebar and click “Reports”.

17. View the Sprint Burndown Chart this shows remaining work over time.

18. View the Velocity Chart if available.

19. In 3–4 sentences, explain what the burndown chart is telling you about your (fictional) sprint progress.

Your explanation: **The burndown chart shows how much work remains in the sprint over time. As issues are completed, the remaining work decreases toward zero. In this sprint, some issues have been completed while others are still in progress, indicating steady progress toward the sprint goal. The chart helps the team monitor whether the sprint is on schedule and identify any delays early.**

Stuck? Watch this: Understanding Jira Reports (Burndown & Velocity)

https://www.youtube.com/watch?v=QlJaTGg_P0M

Simplilearn's tutorial covers reading Jira's built-in charts and reports for beginners.

Submission Guidelines

- Submit this document with all screenshots, tables, and written answers filled in.

- Screenshots must clearly show your project name/key so your work can be verified.
- Do not copy another student's project key, issue names, or screenshots.
- Submit as a PDF or Word document via the LMS / email as instructed by your instructor.

Evaluation Rubric (50 Marks)

Criteria	Marks	Marks Obtained
Account creation & login screenshot	5	
Project created with correct template & key	5	
Jira terminology correctly defined	10	
Issues created (Epic, Stories, Tasks, Bug) with priority & assignee	15	
Sprint started and board updated correctly	10	
Report/burndown explanation (if attempted)	5	
Total	50	

Tip: Keep a browser tab open with the relevant tutorial video any time you're unsure what a button does pause the video at the exact step you're stuck on and replicate it in your own project
